

Count objects using one-to-one correspondence

YEAR 1 MATHS | AUTUMN WEEK 1, DAY 2 | HIGHER CHALLENGE WORKSHEET

Name: _____

Date: _____

1. A set looks different after the objects move. Does the total change? Explain.

2. Create a messy set of eight objects, then show two ways to count it accurately.

3. Ben says the total is 7. He counted 1, 2, 3, 5, 6, 7. Find the error.

4. Why can we start counting at any object if we count each one once?

5. Write advice for a child who keeps counting objects twice.

Check: I used objects, pictures or words to show my thinking.
