

Solve place-value problems

Adult-led preparation before the main lesson. Use precise vocabulary and one step at a time.

Name: _____ Date: _____

1. Which prior skill will help with today's lesson? Read, write, order and compare numbers to 1,000,000 and use negative numbers in familiar contexts.

2. A lift moves from level -5 to level 18. How many floors does it travel?

3. Explain the first step you would take for: A city has 3,804,215 people. Another has 398,760 fewer. What is the second population?

4. Miro says: Miro changes more than one digit when adding 100,000 to 6,945,120. What should Miro check?

Teacher answers and checking prompts

1. Which prior skill will help with today's lesson? Read, write, order and compare numbers to 1,000,000 and use negative numbers in familiar contexts.

Answer Pupil identifies a relevant fact, representation or method.

2. A lift moves from level -5 to level 18. How many floors does it travel?

Answer 23 floors.

3. Explain the first step you would take for: A city has 3,804,215 people. Another has 398,760 fewer. What is the second population?

Answer Read the number in three-digit periods from left to right.

4. Miro says: Miro changes more than one digit when adding 100,000 to 6,945,120. What should Miro check?

Answer Add one hundred-thousand and regroup only when needed. The answer is 7,045,120.
