

Explain and check long multiplication

Adult-led preparation before the main lesson. Use precise vocabulary and one step at a time.

Name: _____ Date: _____

1. Which prior skill will help with today's lesson? Multiply up to four digits by one digit and use place value when multiplying by 10 and 100.

2. Which is closer to $4,208 \times 29$: 120,000 or 1,200,000?

3. Explain the first step you would take for: Miro calculates 326×45 as 1,467. Identify the likely place-value error.

4. Miro says: Miro trusts a written answer without estimating first. What should Miro check?

Teacher answers and checking prompts

1. Which prior skill will help with today's lesson? Multiply up to four digits by one digit and use place value when multiplying by 10 and 100.

Answer Pupil identifies a relevant fact, representation or method.

2. Which is closer to $4,208 \times 29$: 120,000 or 1,200,000?

Answer 120,000.

3. Explain the first step you would take for: Miro calculates 326×45 as 1,467. Identify the likely place-value error.

Answer Estimate the product before calculating.

4. Miro says: Miro trusts a written answer without estimating first. What should Miro check?

Answer An estimate reveals place-value errors before the exact calculation is accepted.
