

Multiply two-digit numbers

Adult-led preparation before the main lesson. Use precise vocabulary and one step at a time.

Name: _____ Date: _____

1. Which prior skill will help with today's lesson? Multiply up to four digits by one digit and use place value when multiplying by 10 and 100.

2. Calculate 68×24 .

3. Explain the first step you would take for: Calculate 47×36 .

4. Miro says: Miro writes the second partial product directly under the first without a zero placeholder. What should Miro check?

Teacher answers and checking prompts

1. Which prior skill will help with today's lesson? Multiply up to four digits by one digit and use place value when multiplying by 10 and 100.

Answer Pupil identifies a relevant fact, representation or method.

2. Calculate 68×24 .

Answer 1,632.

3. Explain the first step you would take for: Calculate 47×36 .

Answer Estimate the product before calculating.

4. Miro says: Miro writes the second partial product directly under the first without a zero placeholder. What should Miro check?

Answer Multiplying by 30 gives tens, so the second row begins in the tens column.
