

Multiply up to four digits by two digits

Adult-led preparation before the main lesson. Use precise vocabulary and one step at a time.

Name: _____ Date: _____

1. Which prior skill will help with today's lesson? Multiply up to four digits by one digit and use place value when multiplying by 10 and 100.

2. Calculate $4,216 \times 34$.

3. Explain the first step you would take for: Calculate $2,304 \times 27$.

4. Miro says: Miro treats the 2 in 27 as 2 rather than 20. What should Miro check?

Teacher answers and checking prompts

1. Which prior skill will help with today's lesson? Multiply up to four digits by one digit and use place value when multiplying by 10 and 100.

Answer Pupil identifies a relevant fact, representation or method.

2. Calculate $4,216 \times 34$.

Answer 143,344.

3. Explain the first step you would take for: Calculate $2,304 \times 27$.

Answer Estimate the product before calculating.

4. Miro says: Miro treats the 2 in 27 as 2 rather than 20. What should Miro check?

Answer The 2 represents two tens, so its partial product is twenty times the first factor.
