

Solve and check division problems

Adult-led preparation before the main lesson. Use precise vocabulary and one step at a time.

Name: _____ Date: _____

1. Which prior skill will help with today's lesson? Use short division by one digit, recall multiplication facts and identify multiples.

2. 4,725 pupils travel in coaches holding 48. How many coaches are needed?

3. Explain the first step you would take for: A charity packs 9,360 tins equally into 36 crates. How many tins per crate?

4. Miro says: Miro accepts a remainder that is larger than the divisor. What should Miro check?

Teacher answers and checking prompts

1. Which prior skill will help with today's lesson? Use short division by one digit, recall multiplication facts and identify multiples.

Answer Pupil identifies a relevant fact, representation or method.

2. 4,725 pupils travel in coaches holding 48. How many coaches are needed?

Answer 99 coaches.

3. Explain the first step you would take for: A charity packs 9,360 tins equally into 36 crates. How many tins per crate?

Answer Estimate the quotient using a nearby multiple.

4. Miro says: Miro accepts a remainder that is larger than the divisor. What should Miro check?

Answer A valid remainder must be smaller than the divisor.
