

Use mental addition and subtraction strategies

Adult-led preparation before the main lesson. Use precise vocabulary and one step at a time.

Name: _____ Date: _____

1. Which prior skill will help with today's lesson? Recall number facts and use place value, partitioning, compensation and inverse operations.

2. Calculate $802,000 - 399,998$ mentally.

3. Explain the first step you would take for: Calculate $499,999 + 235,678$ mentally.

4. Miro says: Miro adds 500,000 instead of 499,999 and forgets to adjust. What should Miro check?

Teacher answers and checking prompts

1. Which prior skill will help with today's lesson? Recall number facts and use place value, partitioning, compensation and inverse operations.

Answer Pupil identifies a relevant fact, representation or method.

2. Calculate $802,000 - 399,998$ mentally.

Answer 402,002.

3. Explain the first step you would take for: Calculate $499,999 + 235,678$ mentally.

Answer Notice the number structure before choosing a method.

4. Miro says: Miro adds 500,000 instead of 499,999 and forgets to adjust. What should Miro check?

Answer Compensate by subtracting 1 after adding 500,000.
