

Plan operations in multi-step problems

Adult-led preparation before the main lesson. Use precise vocabulary and one step at a time.

Name: _____ Date: _____

1. Which prior skill will help with today's lesson? Select operations, use formal methods and interpret answers in context.

2. A club collects £18 from each of 236 members, then spends £1,875. How much remains?

3. Explain the first step you would take for: A shop receives 48 boxes of 125 books and sells 3,760 books. How many remain?

4. Miro says: Miro begins calculating every number in the order it appears. What should Miro check?

Teacher answers and checking prompts

1. Which prior skill will help with today's lesson? Select operations, use formal methods and interpret answers in context.
Answer Pupil identifies a relevant fact, representation or method.
2. A club collects £18 from each of 236 members, then spends £1,875. How much remains?
Answer £2,373.
3. Explain the first step you would take for: A shop receives 48 boxes of 125 books and sells 3,760 books. How many remain?
Answer Read the whole problem and mark the question and useful information.
4. Miro says: Miro begins calculating every number in the order it appears. What should Miro check?
Answer Plan the relationships first. The order of numbers in the text may not match the calculation order.
