

Solve multi-step addition and subtraction problems

Adult-led preparation before the main lesson. Use precise vocabulary and one step at a time.

Name: _____ Date: _____

1. Which prior skill will help with today's lesson? Select operations, use formal methods and interpret answers in context.

2. A charity target is £500,000. It raises £187,650 then £204,875. How much more is needed?

3. Explain the first step you would take for: A venue has 125,000 seats. It sells 48,675 morning tickets and 39,890 evening tickets. How many remain?

4. Miro says: Miro subtracts the two ticket sales separately from the original but loses track of the first subtotal. What should Miro check?

Teacher answers and checking prompts

1. Which prior skill will help with today's lesson? Select operations, use formal methods and interpret answers in context.
Answer Pupil identifies a relevant fact, representation or method.
2. A charity target is £500,000. It raises £187,650 then £204,875. How much more is needed?
Answer £107,475.
3. Explain the first step you would take for: A venue has 125,000 seats. It sells 48,675 morning tickets and 39,890 evening tickets. How many remain?
Answer Read the whole problem and mark the question and useful information.
4. Miro says: Miro subtracts the two ticket sales separately from the original but loses track of the first subtotal. What should Miro check?
Answer Combine the tickets first or label each new subtotal before continuing.
