

Solve problems involving money and measures

Adult-led preparation before the main lesson. Use precise vocabulary and one step at a time.

Name: _____ Date: _____

1. Which prior skill will help with today's lesson? Select operations, use formal methods and interpret answers in context.

2. A 12 km route is split into 8 equal stages. How many metres per stage?

3. Explain the first step you would take for: A class has a £2,500 budget and buys 18 tablets cases at £76 each. How much remains?

4. Miro says: Miro mixes pounds and pence or kilometres and metres in one calculation. What should Miro check?

Teacher answers and checking prompts

1. Which prior skill will help with today's lesson? Select operations, use formal methods and interpret answers in context.
Answer Pupil identifies a relevant fact, representation or method.
2. A 12 km route is split into 8 equal stages. How many metres per stage?
Answer 1,500 m.
3. Explain the first step you would take for: A class has a £2,500 budget and buys 18 tablets cases at £76 each. How much remains?
Answer Read the whole problem and mark the question and useful information.
4. Miro says: Miro mixes pounds and pence or kilometres and metres in one calculation. What should Miro check?
Answer Convert to one unit before calculating and label the final unit.
