

Complete mixed arithmetic efficiently

Adult-led preparation before the main lesson. Use precise vocabulary and one step at a time.

Name: _____ Date: _____

1. Which prior skill will help with today's lesson? Use formal methods with whole numbers and prior learning about decimals and fractions.

2. Calculate $\frac{2}{3}$ of 450, then subtract 75.

3. Explain the first step you would take for: Calculate $3,250 \div 25 + 4.8 \times 6$.

4. Miro says: Miro carries a method from one number type into the next without checking place value or equivalence. What should Miro check?

Teacher answers and checking prompts

1. Which prior skill will help with today's lesson? Use formal methods with whole numbers and prior learning about decimals and fractions.

Answer Pupil identifies a relevant fact, representation or method.

2. Calculate $\frac{2}{3}$ of 450, then subtract 75.

Answer 225.

3. Explain the first step you would take for: Calculate $3,250 \div 25 + 4.8 \times 6$.

Answer Identify the number type and choose an efficient method.

4. Miro says: Miro carries a method from one number type into the next without checking place value or equivalence. What should Miro check?

Answer Pause at each operation and identify the number representation before choosing the method.
