

Fluency with the four operations

Adult-led preparation before the main lesson. Use precise vocabulary and one step at a time.

Name: _____ Date: _____

1. Which prior skill will help with today's lesson? Use formal methods with whole numbers and prior learning about decimals and fractions.

2. Calculate $6,304 \times 27$.

3. Explain the first step you would take for: Calculate $638,475 + 274,806$ and $902,140 - 386,759$.

4. Miro says: Miro switches methods without checking which operation the question uses. What should Miro check?

Teacher answers and checking prompts

1. Which prior skill will help with today's lesson? Use formal methods with whole numbers and prior learning about decimals and fractions.

Answer Pupil identifies a relevant fact, representation or method.

2. Calculate $6,304 \times 27$.

Answer 170,208.

3. Explain the first step you would take for: Calculate $638,475 + 274,806$ and $902,140 - 386,759$.

Answer Identify the number type and choose an efficient method.

4. Miro says: Miro switches methods without checking which operation the question uses. What should Miro check?

Answer Mark the operation and estimate before beginning the exact method.
