

Autumn term assessment

Answer every question. Show methods and explanations. Each question is worth 2 marks.

Name: _____ Date: _____

1. [2] Write in digits: five million, two hundred thousand and nineteen.

6. [2] The school gives 18 pencils to each of 3,200 pupils. How many remain from 61,200?

2. [2] What number is halfway between -8 and 6?

7. [2] Which is a better estimate for $8,316 \div 42$: 20, 200 or 2,000?

3. [2] Round 279,650 to the nearest 1,000.

8. [2] A 2,500 ml drink fills 180 ml cups. How many full cups?

4. [2] Choose an efficient estimate for $48,912 \times 198$ and explain the accuracy.

9. [2] How many factors does 36 have?

5. [2] Calculate $8,035 \times 4$.

10. [2] Find a number below 200 that is both a square and a cube.

Autumn term assessment

Answer every question. Show methods and explanations. Each question is worth 2 marks.

Name: _____ Date: _____

11. [2] Write an expression for subtract 7 from the product of 9 and 6.

16. [2] A £6,000 budget must cover 48 identical items and leave at least £720. What is the greatest whole-pound price per item?

12. [2] Create two different expressions using $n = 4$ that both equal 36.

17. [2] Calculate $8,736 \div 24$.

13. [2] Calculate $675,450 + 99,999$.

18. [2] Write a mixed calculation with answer 100 using a fraction and a whole-number operation.

14. [2] A division has quotient 318 remainder 7 and divisor 29. Find the dividend.

19. [2] Give the range of whole numbers that round to 3,600,000 to the nearest 100,000.

15. [2] Write an operation plan for sharing 9,450 items into 35 equal groups and adding 12 spare items to each group.

20. [2] Write a mixed problem using rounding, multiplication and subtraction, then solve it.

Answers and evidence

1. [2] Write in digits: five million, two hundred thousand and nineteen.
Answer 5,200,019.
2. [2] What number is halfway between -8 and 6?
Answer -1.
3. [2] Round 279,650 to the nearest 1,000.
Answer 280,000.
4. [2] Choose an efficient estimate for $48,912 \times 198$ and explain the accuracy.
Answer About $50,000 \times 200 = 10,000,000$. Other justified close estimates are acceptable.
5. [2] Calculate $8,035 \times 4$.
Answer 32,140.
6. [2] The school gives 18 pencils to each of 3,200 pupils. How many remain from 61,200?
Answer 3,600 pencils.
7. [2] Which is a better estimate for $8,316 \div 42$: 20, 200 or 2,000?
Answer 200.
8. [2] A 2,500 ml drink fills 180 ml cups. How many full cups?
Answer 13 full cups with 160 ml left.
9. [2] How many factors does 36 have?
Answer 9 factors.
10. [2] Find a number below 200 that is both a square and a cube.
Answer 64.

Answers and evidence

11. [2] Write an expression for subtract 7 from the product of 9 and 6.
Answer $9 \times 6 - 7$.
12. [2] Create two different expressions using $n = 4$ that both equal 36.
Answer Examples include $5 \times (4 + 3) + 1$ and $40 - 4$.
13. [2] Calculate $675,450 + 99,999$.
Answer 775,449.
14. [2] A division has quotient 318 remainder 7 and divisor 29. Find the dividend.
Answer 9,229 because $318 \times 29 + 7 = 9,229$.
15. [2] Write an operation plan for sharing 9,450 items into 35 equal groups and adding 12 spare items to each group.
Answer Divide 9,450 by 35, then add 12. Each group has 282 items.
16. [2] A £6,000 budget must cover 48 identical items and leave at least £720. What is the greatest whole-pound price per item?
Answer £110.
17. [2] Calculate $8,736 \div 24$.
Answer 364.
18. [2] Write a mixed calculation with answer 100 using a fraction and a whole-number operation.
Answer Answers vary, for example $1/2$ of $240 - 20 = 100$.
19. [2] Give the range of whole numbers that round to 3,600,000 to the nearest 100,000.
Answer 3,550,000 to 3,649,999.
20. [2] Write a mixed problem using rounding, multiplication and subtraction, then solve it.
Answer Answers vary. The calculation and rounding decision must be justified.

Score bands and intervention response

Lower 0-15 / 40

Immediate structured intervention. Re-teach prerequisite concepts with concrete and visual representations.

Cuspy 16-23 / 40

Targeted short intervention. Address two or three misconceptions, then reassess within two weeks.

Expected 24-31 / 40

Secure core understanding. Revisit any domain below half marks and continue mixed retrieval.

Higher 32-40 / 40

Strong understanding. Use proof, generalisation and unfamiliar multi-step problems for depth.

Teacher decision

Use the band as a starting point. Review which questions were secure, classroom evidence, attendance, language needs and reasonable adjustments. Record a precise intervention, named adult, frequency and review date in the editable evaluation record.
