

Spring term assessment

Answer every question. Show methods and explanations. Each question is worth 2 marks.

Name: _____ Date: _____

1. [2] Which is greater, $\frac{7}{12}$ or $\frac{5}{8}$?

6. [2] Prove or explain your reasoning: Calculate $\frac{1}{4} \times \frac{3}{5}$.

2. [2] Prove or explain your reasoning: Simplify $\frac{42}{56}$.

7. [2] Calculate $\frac{5}{6}$ divided by 3.

3. [2] Calculate $2\frac{1}{3} + 1\frac{5}{6}$.

8. [2] Prove or explain your reasoning: Calculate $\frac{3}{4}$ divided by 2.

4. [2] Prove or explain your reasoning: Calculate $\frac{7}{8} - \frac{5}{12}$.

9. [2] Calculate 6.408×7 .

5. [2] Calculate $\frac{2}{3} \times \frac{9}{10}$ using cancellation.

10. [2] Prove or explain your reasoning: Calculate $50 - 17.485$.

Spring term assessment

Answer every question. Show methods and explanations. Each question is worth 2 marks.

Name: _____ Date: _____

11. [2] Write 35% as a fraction in simplest form.

16. [2] Prove or explain your reasoning: Explain the ratio 5:2 in a sentence.

12. [2] Prove or explain your reasoning: Write 0.625 as a percentage.

17. [2] In the ratio 4:7, the smaller part is 20. What is the larger part?

13. [2] Find 17% of 650.

18. [2] Prove or explain your reasoning: A recipe for 6 uses 450 g flour. How much flour is needed for 14?

14. [2] Prove or explain your reasoning: Find 35% of 480.

19. [2] Simplify 45:60 and find an equivalent ratio with first part 12.

15. [2] Complete the equivalent ratio $7:4 = 28: \underline{\hspace{1cm}}$.

20. [2] Prove or explain your reasoning: Find 37.5% of 640.

Answers and evidence

1. [2] Which is greater, $7/12$ or $5/8$?
Answer $5/8$ because $7/12 = 14/24$ and $5/8 = 15/24$.
2. [2] Prove or explain your reasoning: Simplify $42/56$.
Answer $3/4$. The explanation must show why the method works.
3. [2] Calculate $2\frac{1}{3} + 1\frac{5}{6}$.
Answer $4\frac{1}{6}$.
4. [2] Prove or explain your reasoning: Calculate $7/8 - 5/12$.
Answer $11/24$. The explanation must show why the method works.
5. [2] Calculate $2/3 \times 9/10$ using cancellation.
Answer $3/5$.
6. [2] Prove or explain your reasoning: Calculate $1/4 \times 3/5$.
Answer $3/20$. The explanation must show why the method works.
7. [2] Calculate $5/6$ divided by 3.
Answer $5/18$.
8. [2] Prove or explain your reasoning: Calculate $3/4$ divided by 2.
Answer $3/8$. The explanation must show why the method works.
9. [2] Calculate 6.408×7 .
Answer 44.856 .
10. [2] Prove or explain your reasoning: Calculate $50 - 17.485$.
Answer 32.515 . The explanation must show why the method works.

Answers and evidence

11. [2] Write 35% as a fraction in simplest form.
Answer 7/20.
12. [2] Prove or explain your reasoning: Write 0.625 as a percentage.
Answer 62.5%. The explanation must show why the method works.
13. [2] Find 17% of 650.
Answer 110.5.
14. [2] Prove or explain your reasoning: Find 35% of 480.
Answer 168. The explanation must show why the method works.
15. [2] Complete the equivalent ratio $7:4 = 28: \underline{\hspace{1cm}}$.
Answer 16.
16. [2] Prove or explain your reasoning: Explain the ratio 5:2 in a sentence.
Answer For every 5 of the first quantity, there are 2 of the second. The explanation must show why the method works.
17. [2] In the ratio 4:7, the smaller part is 20. What is the larger part?
Answer 35.
18. [2] Prove or explain your reasoning: A recipe for 6 uses 450 g flour. How much flour is needed for 14?
Answer 1,050 g. The explanation must show why the method works.
19. [2] Simplify 45:60 and find an equivalent ratio with first part 12.
Answer 3:4 and 12:16.
20. [2] Prove or explain your reasoning: Find 37.5% of 640.
Answer 240. The explanation must show why the method works.

Score bands and intervention response

Lower 0-15 / 40

Immediate structured intervention. Re-teach prerequisite concepts with concrete and visual representations.

Cuspy 16-23 / 40

Targeted short intervention. Address two or three misconceptions, then reassess within two weeks.

Expected 24-31 / 40

Secure core understanding. Revisit any domain below half marks and continue mixed retrieval.

Higher 32-40 / 40

Strong understanding. Use proof, generalisation and unfamiliar multi-step problems for depth.

Teacher decision

Use the band as a starting point. Review which questions were secure, classroom evidence, attendance, language needs and reasonable adjustments. Record a precise intervention, named adult, frequency and review date in the editable evaluation record.
