

Simplify fractions

Adult-led preparation before the main lesson. Use precise vocabulary and one step at a time.

Name: _____ Date: _____

1. Which prior skill will help with today's lesson? Recognise equivalent fractions and use common factors and multiples.

2. Which is greater, $\frac{7}{12}$ or $\frac{5}{8}$?

3. Explain the first step you would take for: Simplify $\frac{42}{56}$.

4. Miro says: Miro compares fractions by looking only at the denominators. What should Miro check?

Teacher answers and checking prompts

1. Which prior skill will help with today's lesson? Recognise equivalent fractions and use common factors and multiples.

Answer Pupil identifies a relevant fact, representation or method.

2. Which is greater, $\frac{7}{12}$ or $\frac{5}{8}$?

Answer $\frac{5}{8}$ because $\frac{7}{12} = \frac{14}{24}$ and $\frac{5}{8} = \frac{15}{24}$.

3. Explain the first step you would take for: Simplify $\frac{42}{56}$.

Answer Identify useful common factors or a common denominator.

4. Miro says: Miro compares fractions by looking only at the denominators. What should Miro check?

Answer Convert the fractions to equivalent forms or use a shared benchmark before comparing.
