

Subtract mixed numbers

Adult-led preparation before the main lesson. Use precise vocabulary and one step at a time.

Name: _____ Date: _____

1. Which prior skill will help with today's lesson? Add and subtract fractions with related denominators and convert improper fractions and mixed numbers.

2. A jug contains $3\frac{1}{2}$ litres. $1\frac{3}{4}$ litres are used and $\frac{2}{3}$ litre is added. How much is in the jug?

3. Explain the first step you would take for: Calculate $5\frac{1}{4} - 2\frac{2}{3}$.

4. Miro says: Miro adds or subtracts both the numerators and denominators. What should Miro check?

Teacher answers and checking prompts

1. Which prior skill will help with today's lesson? Add and subtract fractions with related denominators and convert improper fractions and mixed numbers.

Answer Pupil identifies a relevant fact, representation or method.

2. A jug contains $3\frac{1}{2}$ litres. $1\frac{3}{4}$ litres are used and $\frac{2}{3}$ litre is added. How much is in the jug?

Answer $2\frac{5}{12}$ litres.

3. Explain the first step you would take for: Calculate $5\frac{1}{4} - 2\frac{2}{3}$.

Answer Find a common denominator before combining fractions.

4. Miro says: Miro adds or subtracts both the numerators and denominators. What should Miro check?

Answer Use equivalent fractions with a common denominator, then operate on the numerators only.
