

Multiply mixed numbers

Adult-led preparation before the main lesson. Use precise vocabulary and one step at a time.

Name: _____ Date: _____

1. Which prior skill will help with today's lesson? Find fractions of quantities and multiply proper fractions and mixed numbers.

2. A ribbon is $\frac{3}{5}$ m long. Maya uses $\frac{2}{3}$ of it. How much ribbon does she use?

3. Explain the first step you would take for: Calculate $2\frac{1}{2} \times \frac{3}{4}$.

4. Miro says: Miro thinks multiplying always makes a number larger. What should Miro check?

Teacher answers and checking prompts

1. Which prior skill will help with today's lesson? Find fractions of quantities and multiply proper fractions and mixed numbers.

Answer Pupil identifies a relevant fact, representation or method.

2. A ribbon is $\frac{3}{5}$ m long. Maya uses $\frac{2}{3}$ of it. How much ribbon does she use?

Answer $\frac{2}{5}$ m.

3. Explain the first step you would take for: Calculate $2\frac{1}{2} \times \frac{3}{4}$.

Answer Convert mixed numbers to improper fractions when needed.

4. Miro says: Miro thinks multiplying always makes a number larger. What should Miro check?

Answer Multiplying by a proper fraction finds a part, so the result can be smaller than the starting number.
