

Use equivalent fractions when dividing

Adult-led preparation before the main lesson. Use precise vocabulary and one step at a time.

Name: _____ Date: _____

1. Which prior skill will help with today's lesson? Share unit and non-unit fractions equally and connect division with multiplication by a unit fraction.

2. Calculate $2 \frac{1}{4}$ divided by 3.

3. Explain the first step you would take for: Calculate $\frac{5}{6}$ divided by 3.

4. Miro says: Miro divides both the numerator and denominator by the whole number. What should Miro check?

Teacher answers and checking prompts

1. Which prior skill will help with today's lesson? Share unit and non-unit fractions equally and connect division with multiplication by a unit fraction.

Answer Pupil identifies a relevant fact, representation or method.

2. Calculate $2\frac{1}{4}$ divided by 3.

Answer $\frac{3}{4}$.

3. Explain the first step you would take for: Calculate $\frac{5}{6}$ divided by 3.

Answer Represent the fraction as equal parts or use an equivalent multiplication.

4. Miro says: Miro divides both the numerator and denominator by the whole number. What should Miro check?

Answer Division changes the size of each share. Use a bar model or multiply by the unit fraction, then simplify.
