

Solve percentage change problems

Adult-led preparation before the main lesson. Use precise vocabulary and one step at a time.

Name: _____ Date: _____

1. Which prior skill will help with today's lesson? Find percentages of amounts and use percentages in multi-step problems.

2. 84 is 35% of a number. What is the number?

3. Explain the first step you would take for: A £240 coat is reduced by 15%. What is the sale price?

4. Miro says: Miro subtracts the percentage number rather than the percentage amount. What should Miro check?

Teacher answers and checking prompts

1. Which prior skill will help with today's lesson? Find percentages of amounts and use percentages in multi-step problems.
Answer Pupil identifies a relevant fact, representation or method.
2. 84 is 35% of a number. What is the number?
Answer 240.
3. Explain the first step you would take for: A £240 coat is reduced by 15%. What is the sale price?
Answer Find a useful percentage such as 10%, 5% or 1%.
4. Miro says: Miro subtracts the percentage number rather than the percentage amount. What should Miro check?
Answer Calculate the percentage of the original amount first, then apply that change in the context.
