

Describe ratio relationships

Adult-led preparation before the main lesson. Use precise vocabulary and one step at a time.

Name: _____ Date: _____

1. Which prior skill will help with today's lesson? Use multiplicative relationships, ratio notation and equivalent ratios.

2. Explain the ratio 5:2 in a sentence.

3. Explain the first step you would take for: There are 8 red and 12 blue counters. Write red to blue as a ratio.

4. Miro says: Miro adds the same number to both parts to make an equivalent ratio. What should Miro check?

Teacher answers and checking prompts

1. Which prior skill will help with today's lesson? Use multiplicative relationships, ratio notation and equivalent ratios.

Answer Pupil identifies a relevant fact, representation or method.

2. Explain the ratio 5:2 in a sentence.

Answer For every 5 of the first quantity, there are 2 of the second.

3. Explain the first step you would take for: There are 8 red and 12 blue counters. Write red to blue as a ratio.

Answer Identify which quantities the ratio compares and keep their order.

4. Miro says: Miro adds the same number to both parts to make an equivalent ratio. What should Miro check?

Answer Equivalent ratios come from multiplying or dividing both parts by the same factor.
