

Write and interpret ratio notation

Adult-led preparation before the main lesson. Use precise vocabulary and one step at a time.

Name: _____ Date: _____

1. Which prior skill will help with today's lesson? Use multiplicative relationships, ratio notation and equivalent ratios.

2. Complete the equivalent ratio $7:4 = 28: \underline{\hspace{1cm}}$.

3. Explain the first step you would take for: Explain the ratio $5:2$ in a sentence.

4. Miro says: Miro adds the same number to both parts to make an equivalent ratio. What should Miro check?

Teacher answers and checking prompts

1. Which prior skill will help with today's lesson? Use multiplicative relationships, ratio notation and equivalent ratios.

Answer Pupil identifies a relevant fact, representation or method.

2. Complete the equivalent ratio $7:4 = 28:\underline{\hspace{1cm}}$.

Answer 16.

3. Explain the first step you would take for: Explain the ratio $5:2$ in a sentence.

Answer Identify which quantities the ratio compares and keep their order.

4. Miro says: Miro adds the same number to both parts to make an equivalent ratio. What should Miro check?

Answer Equivalent ratios come from multiplying or dividing both parts by the same factor.
