

Find the value of one ratio part

Adult-led preparation before the main lesson. Use precise vocabulary and one step at a time.

Name: _____ Date: _____

1. Which prior skill will help with today's lesson? Use scale factors and ratio parts to solve proportional problems.

2. Share £420 in the ratio 3:4.

3. Explain the first step you would take for: In the ratio 4:7, the smaller part is 20. What is the larger part?

4. Miro says: Miro uses the scale factor on only one corresponding quantity. What should Miro check?

Teacher answers and checking prompts

1. Which prior skill will help with today's lesson? Use scale factors and ratio parts to solve proportional problems.

Answer Pupil identifies a relevant fact, representation or method.

2. Share £420 in the ratio 3:4.

Answer £180 and £240.

3. Explain the first step you would take for: In the ratio 4:7, the smaller part is 20. What is the larger part?

Answer Identify the multiplicative scale or total number of ratio parts.

4. Miro says: Miro uses the scale factor on only one corresponding quantity. What should Miro check?

Answer Apply the same multiplicative relationship to every corresponding measure or ratio part.
