

Assess learning and plan next steps

Adult-led preparation before the main lesson. Use precise vocabulary and one step at a time.

Name: _____ Date: _____

1. Which prior skill will help with today's lesson? Spring learning about fractions, decimals, percentages, ratio and proportion.

2. Calculate $\frac{5}{6} + \frac{7}{12}$.

3. Explain the first step you would take for: Order 0.72, $\frac{7}{10}$ and 73%.

4. Miro says: Miro chooses a familiar method before identifying the number type and relationship. What should Miro check?

Teacher answers and checking prompts

1. Which prior skill will help with today's lesson? Spring learning about fractions, decimals, percentages, ratio and proportion.
Answer Pupil identifies a relevant fact, representation or method.
2. Calculate $5/6 + 7/12$.
Answer $1\frac{5}{12}$.
3. Explain the first step you would take for: Order 0.72, $7/10$ and 73%.
Answer Identify the domain and retrieve the relevant representation or method.
4. Miro says: Miro chooses a familiar method before identifying the number type and relationship. What should Miro check?
Answer Name the domain first, represent the relationship, then choose and check the calculation.
