

# Retrieve decimal and percentage methods

Adult-led preparation before the main lesson. Use precise vocabulary and one step at a time.

Name: \_\_\_\_\_ Date: \_\_\_\_\_

1. Which prior skill will help with today's lesson? Spring learning about fractions, decimals, percentages, ratio and proportion.

2. Simplify 45:60 and find an equivalent ratio with first part 12.

3. Explain the first step you would take for: Find 37.5% of 640.

4. Miro says: Miro chooses a familiar method before identifying the number type and relationship. What should Miro check?

# Teacher answers and checking prompts

1. Which prior skill will help with today's lesson? Spring learning about fractions, decimals, percentages, ratio and proportion.  
**Answer** Pupil identifies a relevant fact, representation or method.
2. Simplify 45:60 and find an equivalent ratio with first part 12.  
**Answer** 3:4 and 12:16.
3. Explain the first step you would take for: Find 37.5% of 640.  
**Answer** Identify the domain and retrieve the relevant representation or method.
4. Miro says: Miro chooses a familiar method before identifying the number type and relationship. What should Miro check?  
**Answer** Name the domain first, represent the relationship, then choose and check the calculation.
