

Use simple formulae

Adult-led preparation before the main lesson. Use precise vocabulary and one step at a time.

Name: _____ Date: _____

1. Which prior skill will help with today's lesson? Recognise rules in number sequences and use simple formulae and symbols.

2. Find A when $A = 3b + 2c$, $b = 7$ and $c = 5$.

3. Explain the first step you would take for: Write a formula for the cost C of n tickets at £6 each plus a £4 booking fee.

4. Miro says: Miro treats a variable as a label instead of a number that can vary. What should Miro check?

Teacher answers and checking prompts

1. Which prior skill will help with today's lesson? Recognise rules in number sequences and use simple formulae and symbols.

Answer Pupil identifies a relevant fact, representation or method.

2. Find A when $A = 3b + 2c$, $b = 7$ and $c = 5$.

Answer 31.

3. Explain the first step you would take for: Write a formula for the cost C of n tickets at £6 each plus a £4 booking fee.

Answer Identify what changes and what stays constant.

4. Miro says: Miro treats a variable as a label instead of a number that can vary. What should Miro check?

Answer State what the variable represents, substitute its value and preserve the operation structure.
