

Convert mass and capacity

Adult-led preparation before the main lesson. Use precise vocabulary and one step at a time.

Name: _____ Date: _____

1. Which prior skill will help with today's lesson? Convert between standard units using decimal notation and solve measure problems.

2. Write 845 mm in metres.

3. Explain the first step you would take for: Convert 2.65 kg to grams and 3,750 ml to litres.

4. Miro says: Miro multiplies whenever converting, regardless of the direction between units. What should Miro check?

Teacher answers and checking prompts

1. Which prior skill will help with today's lesson? Convert between standard units using decimal notation and solve measure problems.

Answer Pupil identifies a relevant fact, representation or method.

2. Write 845 mm in metres.

Answer 0.845 m.

3. Explain the first step you would take for: Convert 2.65 kg to grams and 3,750 ml to litres.

Answer Write the conversion fact and identify whether the unit becomes larger or smaller.

4. Miro says: Miro multiplies whenever converting, regardless of the direction between units. What should Miro check?

Answer Use the size of the target unit to decide the direction, then check whether the numerical value should grow or shrink.
