

Solve multi-step measure problems

Adult-led preparation before the main lesson. Use precise vocabulary and one step at a time.

Name: _____ Date: _____

1. Which prior skill will help with today's lesson? Convert between standard units using decimal notation and solve measure problems.

2. Convert 4.375 km to metres.

3. Explain the first step you would take for: A 12.5 m roll is cut into 40 cm pieces. How many complete pieces can be cut?

4. Miro says: Miro multiplies whenever converting, regardless of the direction between units. What should Miro check?

Teacher answers and checking prompts

1. Which prior skill will help with today's lesson? Convert between standard units using decimal notation and solve measure problems.

Answer Pupil identifies a relevant fact, representation or method.

2. Convert 4.375 km to metres.

Answer 4,375 m.

3. Explain the first step you would take for: A 12.5 m roll is cut into 40 cm pieces. How many complete pieces can be cut?

Answer Write the conversion fact and identify whether the unit becomes larger or smaller.

4. Miro says: Miro multiplies whenever converting, regardless of the direction between units. What should Miro check?

Answer Use the size of the target unit to decide the direction, then check whether the numerical value should grow or shrink.
