

Use decimal notation in conversions

Adult-led preparation before the main lesson. Use precise vocabulary and one step at a time.

Name: _____ Date: _____

1. Which prior skill will help with today's lesson? Convert between standard units using decimal notation and solve measure problems.

2. Use 5 miles is about 8 km. Estimate 30 miles in kilometres.

3. Explain the first step you would take for: Write 845 mm in metres.

4. Miro says: Miro multiplies whenever converting, regardless of the direction between units. What should Miro check?

Teacher answers and checking prompts

1. Which prior skill will help with today's lesson? Convert between standard units using decimal notation and solve measure problems.

Answer Pupil identifies a relevant fact, representation or method.

2. Use 5 miles is about 8 km. Estimate 30 miles in kilometres.

Answer About 48 km.

3. Explain the first step you would take for: Write 845 mm in metres.

Answer Write the conversion fact and identify whether the unit becomes larger or smaller.

4. Miro says: Miro multiplies whenever converting, regardless of the direction between units. What should Miro check?

Answer Use the size of the target unit to decide the direction, then check whether the numerical value should grow or shrink.
