

Calculate cuboid volume

Adult-led preparation before the main lesson. Use precise vocabulary and one step at a time.

Name: _____ Date: _____

1. Which prior skill will help with today's lesson? Recognise, estimate and calculate the volume of cubes and cuboids.

2. A cuboid has volume 360 cm^3 , length 12 cm and width 5 cm. Find its height.

3. Explain the first step you would take for: Find the volume of a cuboid 12 cm by 7 cm by 5 cm.

4. Miro says: Miro calculates the surface area or adds the three dimensions. What should Miro check?

Teacher answers and checking prompts

1. Which prior skill will help with today's lesson? Recognise, estimate and calculate the volume of cubes and cuboids.
Answer Pupil identifies a relevant fact, representation or method.
2. A cuboid has volume 360 cm^3 , length 12 cm and width 5 cm. Find its height.
Answer 6 cm.
3. Explain the first step you would take for: Find the volume of a cuboid 12 cm by 7 cm by 5 cm.
Answer Identify the three perpendicular dimensions in one unit.
4. Miro says: Miro calculates the surface area or adds the three dimensions. What should Miro check?
Answer Volume measures space inside a solid, so multiply all three perpendicular dimensions and use cubic units.
