

Interpret line graphs

Adult-led preparation before the main lesson. Use precise vocabulary and one step at a time.

Name: _____ Date: _____

1. Which prior skill will help with today's lesson? Interpret and construct statistical representations and calculate the mean.

2. A quarter of a 240-pupil pie chart represents walkers. How many pupils walk?

3. Explain the first step you would take for: A line graph rises from 18 to 46. What is the increase?

4. Miro says: Miro divides by the largest value instead of the number of values when finding the mean. What should Miro check?

Teacher answers and checking prompts

1. Which prior skill will help with today's lesson? Interpret and construct statistical representations and calculate the mean.

Answer Pupil identifies a relevant fact, representation or method.

2. A quarter of a 240-pupil pie chart represents walkers. How many pupils walk?

Answer 60 pupils.

3. Explain the first step you would take for: A line graph rises from 18 to 46. What is the increase?

Answer Read the title, labels, scale and total before calculating.

4. Miro says: Miro divides by the largest value instead of the number of values when finding the mean. What should Miro check?

Answer Add every value, count how many values there are, then divide the total by that count.
