

Solve geometry and statistics problems

Adult-led preparation before the main lesson. Use precise vocabulary and one step at a time.

Name: _____ Date: _____

1. Which prior skill will help with today's lesson? Select and connect Year 6 methods in unfamiliar and multi-step problems.

2. Create two different calculations using $\frac{3}{4}$, 0.6 and 25% that both give 30.

3. Explain the first step you would take for: A pie-chart sector is 126 degrees and represents 42 pupils. How many pupils are in the survey?

4. Miro says: Miro starts calculating before deciding what the problem asks and which information matters. What should Miro check?

Teacher answers and checking prompts

1. Which prior skill will help with today's lesson? Select and connect Year 6 methods in unfamiliar and multi-step problems.
Answer Pupil identifies a relevant fact, representation or method.
2. Create two different calculations using $\frac{3}{4}$, 0.6 and 25% that both give 30.
Answer Answers vary and must preserve the stated values and give 30.
3. Explain the first step you would take for: A pie-chart sector is 126 degrees and represents 42 pupils. How many pupils are in the survey?
Answer Identify the goal, constraints and useful information before calculating.
4. Miro says: Miro starts calculating before deciding what the problem asks and which information matters. What should Miro check?
Answer Represent the relationships first, label each subtotal and test the final answer against every condition.
