

Solve mixed measure problems

Adult-led preparation before the main lesson. Use precise vocabulary and one step at a time.

Name: _____ Date: _____

1. Which prior skill will help with today's lesson? Select and connect Year 6 methods in unfamiliar and multi-step problems.

2. A pie-chart sector is 126 degrees and represents 42 pupils. How many pupils are in the survey?

3. Explain the first step you would take for: A cuboid is 12 cm by 8 cm by 5 cm. A third of its volume is filled. What volume remains empty?

4. Miro says: Miro starts calculating before deciding what the problem asks and which information matters. What should Miro check?

Teacher answers and checking prompts

1. Which prior skill will help with today's lesson? Select and connect Year 6 methods in unfamiliar and multi-step problems.
Answer Pupil identifies a relevant fact, representation or method.
2. A pie-chart sector is 126 degrees and represents 42 pupils. How many pupils are in the survey?
Answer 120 pupils.
3. Explain the first step you would take for: A cuboid is 12 cm by 8 cm by 5 cm. A third of its volume is filled. What volume remains empty?
Answer Identify the goal, constraints and useful information before calculating.
4. Miro says: Miro starts calculating before deciding what the problem asks and which information matters. What should Miro check?
Answer Represent the relationships first, label each subtotal and test the final answer against every condition.
