

Solve multi-step number problems

Adult-led preparation before the main lesson. Use precise vocabulary and one step at a time.

Name: _____ Date: _____

1. Which prior skill will help with today's lesson? Select and connect Year 6 methods in unfamiliar and multi-step problems.

2. A cuboid is 12 cm by 8 cm by 5 cm. A third of its volume is filled. What volume remains empty?

3. Explain the first step you would take for: Three fifths of a number is 84. Find 35% of the number.

4. Miro says: Miro starts calculating before deciding what the problem asks and which information matters. What should Miro check?

Teacher answers and checking prompts

1. Which prior skill will help with today's lesson? Select and connect Year 6 methods in unfamiliar and multi-step problems.

Answer Pupil identifies a relevant fact, representation or method.

2. A cuboid is 12 cm by 8 cm by 5 cm. A third of its volume is filled. What volume remains empty?

Answer 320 cm³.

3. Explain the first step you would take for: Three fifths of a number is 84. Find 35% of the number.

Answer Identify the goal, constraints and useful information before calculating.

4. Miro says: Miro starts calculating before deciding what the problem asks and which information matters. What should Miro check?

Answer Represent the relationships first, label each subtotal and test the final answer against every condition.
