

Calculate intervals across zero

Adult-led preparation before the main lesson. Use precise vocabulary and one step at a time.

Name: _____ Date: _____

1. Which prior skill will help with today's lesson? Read, write, order and compare numbers to 1,000,000 and use negative numbers in familiar contexts.

2. The temperature is -6°C and rises by 9°C . What is it now?

3. Explain the first step you would take for: What is the difference between -4 and 7 ?

4. Miro says: Miro counts both zero and the starting number when finding the interval from -4 to 7 . What should Miro check?

Teacher answers and checking prompts

1. Which prior skill will help with today's lesson? Read, write, order and compare numbers to 1,000,000 and use negative numbers in familiar contexts.

Answer Pupil identifies a relevant fact, representation or method.

2. The temperature is -6°C and rises by 9°C . What is it now?

Answer 3°C .

3. Explain the first step you would take for: What is the difference between -4 and 7 ?

Answer Read the number in three-digit periods from left to right.

4. Miro says: Miro counts both zero and the starting number when finding the interval from -4 to 7 . What should Miro check?

Answer Count the jumps between numbers: 4 jumps to zero and 7 more to reach 7, giving 11.
