

Compare and order large numbers

Adult-led preparation before the main lesson. Use precise vocabulary and one step at a time.

Name: _____ Date: _____

1. Which prior skill will help with today's lesson? Read, write, order and compare numbers to 1,000,000 and use negative numbers in familiar contexts.

2. Order 7,405,090, 7,450,009 and 7,045,900 from least to greatest.

3. Explain the first step you would take for: Compare 5,906,120 and 5,960,102.

4. Miro says: Miro compares the final digits first because they are on the right. What should Miro check?

Teacher answers and checking prompts

1. Which prior skill will help with today's lesson? Read, write, order and compare numbers to 1,000,000 and use negative numbers in familiar contexts.

Answer Pupil identifies a relevant fact, representation or method.

2. Order 7,405,090, 7,450,009 and 7,045,900 from least to greatest.

Answer 7,045,900, 7,405,090, 7,450,009.

3. Explain the first step you would take for: Compare 5,906,120 and 5,960,102.

Answer Read the number in three-digit periods from left to right.

4. Miro says: Miro compares the final digits first because they are on the right. What should Miro check?

Answer Compare from the greatest place value on the left and stop at the first different digit.
