

Solve long multiplication problems

Adult-led preparation before the main lesson. Use precise vocabulary and one step at a time.

Name: _____ Date: _____

1. Which prior skill will help with today's lesson? Multiply up to four digits by one digit and use place value when multiplying by 10 and 100.

2. A factory packs 2,315 items each day for 32 days. How many items?

3. Explain the first step you would take for: A theatre has 1,248 seats in each of 24 identical sections. How many seats are there?

4. Miro says: Miro calculates correctly but gives a product with no unit or context. What should Miro check?

Teacher answers and checking prompts

1. Which prior skill will help with today's lesson? Multiply up to four digits by one digit and use place value when multiplying by 10 and 100.
Answer Pupil identifies a relevant fact, representation or method.
2. A factory packs 2,315 items each day for 32 days. How many items?
Answer 74,080 items.
3. Explain the first step you would take for: A theatre has 1,248 seats in each of 24 identical sections. How many seats are there?
Answer Estimate the product before calculating.
4. Miro says: Miro calculates correctly but gives a product with no unit or context. What should Miro check?
Answer Return to the question, label the answer and complete every step in the context.
