

Interpret division remainders

Adult-led preparation before the main lesson. Use precise vocabulary and one step at a time.

Name: _____ Date: _____

1. Which prior skill will help with today's lesson? Use short division by one digit, recall multiplication facts and identify multiples.

2. Calculate $5,126 \div 24$ and write the remainder as a fraction.

3. Explain the first step you would take for: Calculate $6,745 \div 32$ and interpret the answer for 32-seat coaches.

4. Miro says: Miro always rounds a quotient with a remainder up. What should Miro check?

Teacher answers and checking prompts

1. Which prior skill will help with today's lesson? Use short division by one digit, recall multiplication facts and identify multiples.

Answer Pupil identifies a relevant fact, representation or method.

2. Calculate $5,126 \div 24$ and write the remainder as a fraction.

Answer 213 remainder 14, or $213 \frac{7}{12}$.

3. Explain the first step you would take for: Calculate $6,745 \div 32$ and interpret the answer for 32-seat coaches.

Answer Estimate the quotient using a nearby multiple.

4. Miro says: Miro always rounds a quotient with a remainder up. What should Miro check?

Answer The context decides whether to round up, round down, keep the remainder or express it as a fraction.
