

Use long division with exact answers

Adult-led preparation before the main lesson. Use precise vocabulary and one step at a time.

Name: _____ Date: _____

1. Which prior skill will help with today's lesson? Use short division by one digit, recall multiplication facts and identify multiples.

2. Calculate $9,408 \div 32$.

3. Explain the first step you would take for: Calculate $8,736 \div 24$.

4. Miro says: Miro subtracts the multiple correctly but forgets to bring down the next digit. What should Miro check?

Teacher answers and checking prompts

1. Which prior skill will help with today's lesson? Use short division by one digit, recall multiplication facts and identify multiples.
Answer Pupil identifies a relevant fact, representation or method.
2. Calculate $9,408 \div 32$.
Answer 294.
3. Explain the first step you would take for: Calculate $8,736 \div 24$.
Answer Estimate the quotient using a nearby multiple.
4. Miro says: Miro subtracts the multiple correctly but forgets to bring down the next digit. What should Miro check?
Answer After each subtraction, bring down exactly one next place-value digit.
