

Use short division with two-digit divisors

Adult-led preparation before the main lesson. Use precise vocabulary and one step at a time.

Name: _____ Date: _____

1. Which prior skill will help with today's lesson? Use short division by one digit, recall multiplication facts and identify multiples.

2. Calculate $5,616 \div 18$.

3. Explain the first step you would take for: Calculate $3,744 \div 12$.

4. Miro says: Miro uses a one-digit division fact and forgets the full two-digit divisor. What should Miro check?

Teacher answers and checking prompts

1. Which prior skill will help with today's lesson? Use short division by one digit, recall multiplication facts and identify multiples.
Answer Pupil identifies a relevant fact, representation or method.
2. Calculate $5,616 \div 18$.
Answer 312.
3. Explain the first step you would take for: Calculate $3,744 \div 12$.
Answer Estimate the quotient using a nearby multiple.
4. Miro says: Miro uses a one-digit division fact and forgets the full two-digit divisor. What should Miro check?
Answer Each quotient digit must represent a multiple of the complete divisor.
