

Classify prime, square and cube numbers

Adult-led preparation before the main lesson. Use precise vocabulary and one step at a time.

Name: _____ Date: _____

1. Which prior skill will help with today's lesson? Recall multiplication facts, recognise factor pairs and identify square and cube numbers.

2. Is 91 prime? Explain.

3. Explain the first step you would take for: Classify 97, 144 and 125.

4. Miro says: Miro says 1 is prime because it has no factor pairs apart from itself. What should Miro check?

Teacher answers and checking prompts

1. Which prior skill will help with today's lesson? Recall multiplication facts, recognise factor pairs and identify square and cube numbers.

Answer Pupil identifies a relevant fact, representation or method.

2. Is 91 prime? Explain.

Answer No, because $91 = 7 \times 13$.

3. Explain the first step you would take for: Classify 97, 144 and 125.

Answer State whether the task concerns factors or multiples.

4. Miro says: Miro says 1 is prime because it has no factor pairs apart from itself. What should Miro check?

Answer A prime number has exactly two factors. The number 1 has only one factor.
