

Identify common factors

Adult-led preparation before the main lesson. Use precise vocabulary and one step at a time.

Name: _____ Date: _____

1. Which prior skill will help with today's lesson? Recall multiplication facts, recognise factor pairs and identify square and cube numbers.

2. List the common factors of 36 and 60.

3. Explain the first step you would take for: Find the highest common factor of 84 and 126.

4. Miro says: Miro chooses the largest factor from either list rather than the largest shared factor. What should Miro check?

Teacher answers and checking prompts

1. Which prior skill will help with today's lesson? Recall multiplication facts, recognise factor pairs and identify square and cube numbers.

Answer Pupil identifies a relevant fact, representation or method.

2. List the common factors of 36 and 60.

Answer 1, 2, 3, 4, 6 and 12.

3. Explain the first step you would take for: Find the highest common factor of 84 and 126.

Answer State whether the task concerns factors or multiples.

4. Miro says: Miro chooses the largest factor from either list rather than the largest shared factor. What should Miro check?

Answer A common factor must divide both numbers exactly.
