

Use multiplication and division before addition and subtraction

Adult-led preparation before the main lesson. Use precise vocabulary and one step at a time.

Name: _____ Date: _____

1. Which prior skill will help with today's lesson? Calculate accurately with the four operations and understand grouping with brackets.

2. Calculate $90 - 36 \div 6$.

3. Explain the first step you would take for: Calculate $18 + 6 \times 7$.

4. Miro says: Miro adds 18 and 6 before multiplying by 7. What should Miro check?

Teacher answers and checking prompts

1. Which prior skill will help with today's lesson? Calculate accurately with the four operations and understand grouping with brackets.

Answer Pupil identifies a relevant fact, representation or method.

2. Calculate $90 - 36 \div 6$.

Answer 84.

3. Explain the first step you would take for: Calculate $18 + 6 \times 7$.

Answer Identify brackets and multiplication or division before calculating.

4. Miro says: Miro adds 18 and 6 before multiplying by 7. What should Miro check?

Answer Multiplication has priority, so calculate 6×7 first.
