

Choose an efficient calculation method

Adult-led preparation before the main lesson. Use precise vocabulary and one step at a time.

Name: _____ Date: _____

1. Which prior skill will help with today's lesson? Recall number facts and use place value, partitioning, compensation and inverse operations.

2. Choose an efficient method for $6,300 \div 25$.

3. Explain the first step you would take for: Choose an efficient method for $3,998 + 2,507$ and calculate.

4. Miro says: Miro believes the longest written method is always the safest choice. What should Miro check?

Teacher answers and checking prompts

1. Which prior skill will help with today's lesson? Recall number facts and use place value, partitioning, compensation and inverse operations.

Answer Pupil identifies a relevant fact, representation or method.

2. Choose an efficient method for $6,300 \div 25$.

Answer Multiply by 4 then divide by 100, or use known multiples: 252.

3. Explain the first step you would take for: Choose an efficient method for $3,998 + 2,507$ and calculate.

Answer Notice the number structure before choosing a method.

4. Miro says: Miro believes the longest written method is always the safest choice. What should Miro check?

Answer An efficient method fits the numbers and still allows a reliable check.
