

Estimate the size of answers

Adult-led preparation before the main lesson. Use precise vocabulary and one step at a time.

Name: _____ Date: _____

1. Which prior skill will help with today's lesson? Recall number facts and use place value, partitioning, compensation and inverse operations.

2. Estimate $92,410 \div 31$.

3. Explain the first step you would take for: Estimate $6,782 \times 49$.

4. Miro says: Miro rounds every number to one significant digit even when this gives a poor estimate. What should Miro check?

Teacher answers and checking prompts

1. Which prior skill will help with today's lesson? Recall number facts and use place value, partitioning, compensation and inverse operations.

Answer Pupil identifies a relevant fact, representation or method.

2. Estimate $92,410 \div 31$.

Answer About $90,000 \div 30 = 3,000$.

3. Explain the first step you would take for: Estimate $6,782 \times 49$.

Answer Notice the number structure before choosing a method.

4. Miro says: Miro rounds every number to one significant digit even when this gives a poor estimate. What should Miro check?

Answer Choose compatible rounded values that keep the calculation easy and reasonably close.
