

Solve multi-step multiplication and division problems

Adult-led preparation before the main lesson. Use precise vocabulary and one step at a time.

Name: _____ Date: _____

1. Which prior skill will help with today's lesson? Select operations, use formal methods and interpret answers in context.

2. A printer makes 1,250 leaflets per hour for 28 hours and packs them in bundles of 50. How many bundles?

3. Explain the first step you would take for: A warehouse has 36 pallets with 24 boxes each. It shares all boxes equally among 18 shops. Boxes per shop?

4. Miro says: Miro rounds an intermediate exact answer before completing the second step. What should Miro check?

Teacher answers and checking prompts

1. Which prior skill will help with today's lesson? Select operations, use formal methods and interpret answers in context.
Answer Pupil identifies a relevant fact, representation or method.
2. A printer makes 1,250 leaflets per hour for 28 hours and packs them in bundles of 50. How many bundles?
Answer 700 bundles.
3. Explain the first step you would take for: A warehouse has 36 pallets with 24 boxes each. It shares all boxes equally among 18 shops. Boxes per shop?
Answer Read the whole problem and mark the question and useful information.
4. Miro says: Miro rounds an intermediate exact answer before completing the second step. What should Miro check?
Answer Keep exact sub-totals unless the context or question asks for rounding.
