

Reason about arithmetic relationships

Adult-led preparation before the main lesson. Use precise vocabulary and one step at a time.

Name: _____ Date: _____

1. Which prior skill will help with today's lesson? Use formal methods with whole numbers and prior learning about decimals and fractions.

2. If $48 \times 125 = 6,000$, find 4.8×125 .

3. Explain the first step you would take for: If $4,725 / 35 = 135$, find $4,725 / 350$.

4. Miro says: Miro changes one factor by ten but expects the product to stay unchanged. What should Miro check?

Teacher answers and checking prompts

1. Which prior skill will help with today's lesson? Use formal methods with whole numbers and prior learning about decimals and fractions.

Answer Pupil identifies a relevant fact, representation or method.

2. If $48 \times 125 = 6,000$, find 4.8×125 .

Answer 600.

3. Explain the first step you would take for: If $4,725 / 35 = 135$, find $4,725 / 350$.

Answer Identify the number type and choose an efficient method.

4. Miro says: Miro changes one factor by ten but expects the product to stay unchanged. What should Miro check?

Answer Changing a factor by a power of ten changes the product by the same scale unless another factor compensates.
